Reviews

Comprehensive guide! Its this type of very good read through. It is actually writter in simple words and phrases rather than difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

From the U.S. electrical grid and all its back-ups, engine control-management systems, early warning systems on U.S. satellites, every motor vehicle, aircraft and ship made after 1985, to even simple memory chips inside children s teddy bears-every electronic fuse, resistor, or connector that was Made in China becomes dormant. forever. At one minute past midnight on January 1st, every modern television broadcast of the U.S. New Year s Eve festivities on the East Coast black-out. Millions of motor vehicles with an engine management system or engine-computerized system suddenly die, causing loss of control and thousands of accidents only seconds into the New Year. Traffic lights, directional beacons, communication stations, and all aircraft landing systems black out a couple of minutes later, as their modern back-ups start failing. Children s Christmas presents, nearly forgotten, stop buzzing, moving, and blinking and go silent. Radios, computers, and all forms of electronic communication devices-even the latest 132 million electronic Christmas presents given only a week earlier (iPhone 5Gs, iPod Nano 4s, IMac Notepads and iPad 3s) go silent, never to blink on again. Ninety seconds after midnight, the entire electrical grid of North America deactivates itself and goes into close-down mode.
