

## Nematode Vectors of Plant Viruses

Filesize: 2.89 MB

### Reviews

*This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It's been designed in an exceptionally simple way and is particularly only right after i finished reading this ebook in which basically modified me, alter the way i believe.*

*(Prof. Loyce Runolfsson Jr.)*

Book Condition: New. Publisher/Verlag: Springer, Berlin | Although nematodes had long been suspected as vectors of soil borne plant diseases, unequivocal proof of their implication was not forthcoming until 1958 when Professor William Hewitt and his colleagues in California demonstrated experimentally that *Xiphinema* ~ was the vector of grapevine fanleaf virus. This opened up a new and exciting field in plant pathology and discoveries quickly followed of other nematode species associated with soil-borne diseases of many different crops and in several countries. After the initial enthusiasm of discovering new vectors and new viruses there followed a period of consolidation in which research workers sought answers to tantalising questions about the location of the virus within the nematode, the factors governing the close specificity between virus and vector; and more mundane but equally important and compelling questions about life cycles, geographical distribution, host relations, morphology and taxonomy. No other group of nematodes has attracted such a concentrated effort involving many different scientific specialisations and yielding so much progress in a relatively short time. The NATO Advanced Study Institute held at Riva dei Tessali, Italy, during 19 May to 2 June, 1974, provided the forum for a critical discussion of all aspects of biology of virus vector nematodes. | Virus Vector Nematode - Taxonomy and General Introduction.- Morphology of Longidoridae.- Taxonomy of *Xiphinema* Cobb, 1913.- A "Lattice" for the Identification of Species of *Xiphinema* Cobb, 1913.- Taxonomy of *Longidorus* (Micoletzky) Filipjev and *Paralongidorus* Siddiqi, Hooper and Khan.- Morphology of Trichodoridae.- Taxonomy of Trichodoridae.- Functional Morphology of Dorylaimida.- Cytogenetics and Reproduction in *Xiphinema* and *Longidorus*.- Short Report: Embryology and hatching of *Trichodorus similis* and *Longidorus elongatus*.- Cell Structure and Function - An Introduction to Ultrastructure.- Ultrastructure of Dorylaimidae.- The Structure and Musculature of the Feeding Apparatus in *Longidorus* and...
