Not illustrated. 1915 Excerpt: .necessary are shut down, and all protective deck stop valves to pipes above it are closed. 5. Pressure is put on the fire main. 6. All pumps are put on the drains. 7. Ashes are hoisted. 8. Coal is trimmed down into the lower bunkers (not done for practice). At collision drill the closing of all water-tight doors and hatches in the engine rooms, boiler rooms, and their dependencies is done by the engineer s force. All available pumps are connected with the flooded compartments or with the compartments Into which the flooded ones drain. At fire quarters the steam pumps are started when the alarm is sounded, and pressure is put on the fire main. Blowers that lead to the vicinity of the fire must be stopped. When getting under way, coming to anchor, mooring, or unmooring, the men of the engineer force not on...

Reviews

This ebook is definitely not simple to begin on reading but really enjoyable to read through. This really is for all who statte that there had not been a worth reading. You may like how the author publish this ebook.

This book may be really worth a read through, and a lot better than other. It is really basic but excitement inside the 50 % in the pdf. I realized this pdf from my dad and i encouraged this publication to learn.
